Water treatment system against scale and rust by CWT

May 2011

I'm Lance Butcher and my wife and I live on a 5 acre property at Gelorup, 20 minutes south of Bunbury in Western Australia. Our local water contains high levels of iron, which was causing enormous problems with our reticulation system. Large quantities of iron sludge and chips would build up in the piping system and block the solenoids and individual sprinklers. The situation was getting us both down. It seemed like the sprinklers were continually blocked and I was replacing the solenoids every six months.

Within three months of installing the CWT water treatment system the iron residual and sludge disappeared. I was staggered by the results. The pipe was completely clear and there were no signs of the iron scale at all.

A reliable and clean sprinkler system is very important for us to maintain a healthy garden which contains more than 200 rose bushes and half an acre of trees and cottage garden. Our horse paddocks are also under reticulation. The CWT system has saved me an enormous amount of time and money and I'm no longer cleaning sprinkler heads or replacing the solenoids in the reticulation system.

The results have been so successful we are now planning a major expansion of the garden and bird aviary. I would recommend this product for anyone who lives in a hard water area in Australia. They're simple to install and maintenance free.

Lance Butcher from Western Australian enjoying his clean sprinkler system after installing the CWT water treatment system.
